HTML, CSS, JavaScript, JSX, React Js

A fully responsive personal portfolio website built using React Js.

The portfolio is categorized into sections such as about me, skills, projects, contact.

Organized the folder structure into components and containers.

Luhn's Algorithm Using Java | [Link](#)

Core Java

Luhn algorithm, also known as modulus 10 or mod 10 algorithm, is a simple checksum process for validating various identification numbers such as credit card numbers, Canadian social securities numbers. This algorithm is

designed to protect against mistyped or accidental error rather than malicious attacks.

Most credit card companies adopted this algorithm as this was available in the public domain and can be used by anyone.

[Certificate](#) of Full Stack Java Course Completion at PAYILAGAM in Chennai.
